Projects

- **Photography Website**

A website for photographers to share photos, sell photography equipment and courses, and find clients.
Made using Angular, PHP, and MySQL.

- **Content-Based Video Retriever**

A tool for searching and retrieving videos based on their audio and visual content using search queries.
Made using Python.

- **Basic Artificial Neural Network Implementation**

A basic implementation of an ANN structure, including forward propagation, loss functions, gradient descent, and backpropagation.
Made using Python.

Skills

- Full-Stack Web Development Using Angular, PHP, and MySQL
 - Neural Network Development Using Python
 - Database Management Using Oracle XE
 - Basic Graphic Interface Development Using Pygame
 - Operating Systems: Windows, Linux
 - Code Editor: Visual Studio Code
 - Programming Languages: MATLAB, C, Python, JavaScript, Java, R, PHP
 - Version Control: Git, GitHub
 - Debugging
-

Education

Since 2023: ISTIC University

Second Year Student, specialized in Computer Science.

2022: Nabheni Highschool

Bachelor graduate with very good honors specialized in Computer science

Languages

English, French and Arabic.
